

TimberGrip™ & QuartzGrip™ Anti Slip Plate

TimberGrip™

A new product in our range, designed to combine the aesthetics of conventional timber decking with an effective anti slip surface.

TimberGrip™ is easy to install. Simply drop into a rebated channel within the timber for a flush surface. Alternatively, low profile **Decking Strips** are available. These low-profile strips fit directly on-to the decking surface. Simply screw and glue into place. TimberGrip™ is available in a range of colours, and sizes to suit.

TimberGrip™ is ideal for all exterior decking, including **walkways, bridges, jetties, pontoons, balconies, & platforms.**

The plates are available in the following panel sizes;

2440 x 1220 x 4mm • 1220 x 1220 x 4mm

1220 x 600 x 4mm • 2000 x 1000 x 4mm

Stock colours: Black, yellow or grey

Bespoke panels are available in **RAL & BS** colours to complement your corporate image.

A cutting service is available, with panels cut to your requested dimensions. If required fixing points can be pre-drilled, for ease of installation. High visibility yellow hazard warning lines & logos can be applied to panels upon request.

QuartzGrip™ Anti Slip Plates are quick and easy to install, with minimal down time. Simply glue or screw to your existing substrate. Full **Installation instructions** and **COSHH data sheets** are available upon request. A range of rapid setting adhesives and stainless steel fixings are available at competitive prices.

A **nationwide fitting service** is also available. Please contact us for a quotation.

QuartzGrip™ Anti Slip Plate

A range of low profile 4mm thick, anti-slip plates, suitable for installation onto existing concrete, timber or steel chequer plate substrates. These plates provide an

extremely cost effective solution and help rejuvenate worn, slippery and tired **walkways, access ramps, gangways, bridges, and industrial floors.**

A durable quartz "Grit" is applied to the top surface which provides exceptional slip resistance **BS7976 – 2 (2002).**

- Easy to install
- Effective anti slip surface
- Durable & long-lasting
- Corrosion resistant
- Low maintenance

QuartzGrip™ Anti Slip Stair Covers & Nosing

QuartzGrip™ Anti Slip Stair Tread Covers are designed to fit existing **timber, concrete** or **steel chequer plate** steps. Over time conventional steps become worn, polished, damaged, corroded and slippery due to a variety of environmental and usage factors.

QuartzGrip™ Anti Slip Stair Tread Covers are easy to install and provide an attractive fresh look to existing steps.

QuartzGrip™ Anti Slip Stair Tread Covers are available in **black with yellow nosing**, as standard. This high visibility nosing provides an effective contrast and highlights the leading edge of the step, assisting the partially sighted and improving safety standards in low light areas.

Alternatively **safety yellow** or **stone grey** covers are available from stock. Bespoke tread covers are available in all **RAL & BS** colours upon request, to complement your corporate image.

Unlike proprietary resin systems which require time to cure, these pre-formed glass reinforced plastic stair tread covers are quick and **easy to install**; Surface preparation is minimal, **simply glue or screw** into place and the stairs are ready to walk on, reducing down-time.

- Easy to install
- Effective anti slip surface
- Durable & long-lasting
- Corrosion resistant
- Low maintenance

QuartzGrip™ Anti Slip Stair Nosing provides a low-cost alternative to our stair tread covers. Available in **safety yellow** as standard, the stair nosing is manufactured from durable glass reinforced plastic, with a gritted **anti-slip** surface. All nosings are 70mm wide, with a chamfered back edge and 40mm drop nosing.
